"Esther"

Thanks for getting the RX to us so quickly. Esther is happy to have chicken flavor, as most of her other medications have come in tuna flavor and she doesn't like fish.

#### In Memorium

Jerry W. Snee, RPH, founder of Creative Compounding Center, passed away on April 26, 2014. He graduated from Wayne State University in 1966. His pharmacist career began at pharmacies in Detroit. He worked at independent pharmacies and pharmacies he had owned from 1980 and 1999. Loving compounding, he and his wife Cheryl opened Creative Compounding Center in Lapeer, Michigan in 1999. They moved their business to 1400 E. Lapeer Ave. in 2014 and built a state of the art compounding lab when they outgrew their building in Lapeer.

Jerry was actively involved in business and community activities. He was a member of Holy Redeemer Lutheran Church in Dryden, MI. and belonged to IACP, PCCA, ACA, BNI, Imlay City Historical Society. He was the President of the Almont Historical Society.

### **Compounded Products**

We specialize in making prescriptions for all kinds of patients. Different patients, whether human or animal, have different needs. We can create individual doses and transform tablets and capsules into a liquid form for the patient who has trouble swallowing pills. The liquid medication can also be flavored with one or more than 150 different flavors, such as cotton candy, strawberry, or grape.

Other medications can be changed into topical rather than oral dosages, such as ibuprofen made into a cream for arthritis. You can apply it to the area in pain instead of taking it and getting an upset stomach.

For children, we make rapid-dissolve tablets, or a lollipop or gummy bears with the medication in it. For patients with allergies, we can create prescriptions that use different fillers and can be dye and preservative free based on the patient's need.

We specialize in pet prescriptions. Dogs, cats, and larger animals use human medications, but in different dosages. Animal medications are made in capsule, topical, or liquid form and we can flavor the liquids with delicious "animal" flavors.

Please use the color code below to assist in your search. This is a list of **some** of the things we can make. Call 1-800-672-2177 if you do not see the medication you need; we probably can compound it to fit your needs. Thank You.

I started having PSVT when I was 23, now 42. I was also on verapamil, propranolol and atenolol at the same time. I felt like the walking dead from time I got up till I went to bed. So had RF ablation done. Was fine for several years, no medicines, no problems. Then PSVT was back full force was put on digoxin that was increased several times due to lack of control. Had stress test done and after just over 1 minute was stopped by Doctor put in hospital taken off digoxin and started on 50 mg of metoprolol. I now have fair control of PSVT with just minor problems that I can control maybe once a month unless stressed and PSVT can be trouble couple times a day. Main side effect is energy level REAL low.

Been taking metoprolol for about a year and a half. I can just about tell you the time of day it is since I have been taken a dose. Heart rate increases, I can feel my blood pressure increase to the point of feeling my pulse in my fingertips for example. I know it is either 7:00 am or 7:00 pm. These are the times I take this drug. 30 minutes later all is well. Thanks doctor.
