SUBJECT: Thiopental Injection Purchase

Dear (b) (7)(C)

The Arkansas Department of Corrections (ADC) uses Thiopental Injection to carry out Capital Punishment in Arkansas. In accordance Arkansas State Law, A.C.A. § 5-4-617, "The sentence of death is to be carried out by intravenous lethal injection of one (1) or more chemicals, as determined in kind and amount in the discretion of the Director of the Department of Correction. The chemical or chemicals injected may include one (1) or more of the following substances: one (1) or more ultra-short-acting barbiturate, one (1) or more chemical paralytic agents, potassium chloride, or any other chemical or chemicals, including but not limited to saline solution." The Director of the Arkansas Department of Correction by Administrative Directive has ordered that sodium pentothal or Thiopental sodium be used for the first chemical.

The Arkansas Department of Correction placed an order earlier this year with a manufacturer in the United States, but has been advised that they have none in stock, nor is any expected this year. In order to carry out the State of Arkansas' constitutional mandates in death penalty cases, we desire to make the following purchase:

Name/Description Quantity	Quantity	Price (ea)	Total
Thiopental Injection, power for reconstitution, thiopental sodium, 500mg vial packs of 25's	(b) (4)	(b) (4) GBP	(b) (4)

Shipping Location:

**Arkansas Department of Correction
Central Administration Office
ATTN: Wendy Kelley, Deputy Director
6814 Princeton Pike
Pine Bluff, AR 71602-9411
Telephone: 870-550-7307**

United States Drug Enforcement Agency Number (b) (5)

Our (b) (7)(E) account is (b) (7)(E)

I understand the expiration date of the chemical currently available is February 2014. I can be reached by telephone at 001-870-550-7307 or by e-mail: wendy.kelley@arkansas.gov

Sincerely,

**Wendy L. Kelley,
Deputy Director for Health & Correctional Programs
Arkansas Department of Corrections**
