Hi Michael,
My apologies for not getting back with you yesterday...
I posed your question to the Undersheriff, and his reply is as follows:

While I am not familiar with what San Jose has said, my understanding is that the acquisition or use of this technology comes with a strict non-disclosure requirement. Therefore it would be inappropriate for us to comment about any agency that may be using the technology.

Undersheriff James Lewis

Hi Lisa,

I haven't heard back from you and I want to give you guys the benefit of the doubt here before I print anything. Are you guys saying that San Jose PD is wrong and you don't use Stingray/IMSI technology or just saying you are not commenting? Thanks - Michael

Hi Michael,
I've re-consulted our Legal Department and they have nothing new to add.

Hi Lisa,

Any idea when you will have some info on this? The story will run sometime this week, but I want to give you an opportunity to respond. Thanks

Michael

Their Stingray was funded through a grant from the California Emergency Management Agency... as part of the Bay Area UASI initiative. They reference you guys in a few places...saying they've contacted law enforcement that uses the technology. I'm circling back to you guys because the PRA I submitted to you guys asking for contracts & Grant applications for Harris equipment only came back showing the purchase of some sort of radio...but nothing to do with Stingrays.
